Project Progress Report - 11/28/2020 - week 14

1) Which tasks have been completed?

- Test DataSet
- Preprocessing Test DataSet - section 5.1 of paper

2) Which tasks are pending?

- Aspect Identification
- Aspect rating prediction
- Aspect weight prediction

3) Are you facing any challenges?

- Identifying visualization methods and parameters to visualize. I will be using python matplotlib but will need to identify the correct parameters to plot.
- Have yet to test if the code will run on local laptop with the entire dataset
